

LEADERSHIP & OPERATIONS MANAGEMENT

PORTFOLIO

Executive Summary: Strategic Leadership and Operational Excellence

A results-driven operations leader with demonstrated success managing complex academic operations, scaling distributed teams, and delivering measurable organizational impact. Proven track record includes recruiting and onboarding 75+ remote instructors, implementing enterprise management systems that reduced administrative overhead by 40%, and directing multi-site educational programs serving diverse communities. Expertise spans strategic workforce planning, digital transformation, curriculum project management under aggressive deadlines, and process optimization through data analytics. Core competencies include translating business requirements into scalable digital solutions and leading high-performing cross-cultural teams in tech-education and ESL contexts.

1. Academic Operations Manager (AOM)

Quality Online Education Group (QOEG)

January 2018 – June 2020

As Academic Operations Manager for a growing online education provider, I established the operational infrastructure, implemented mission-critical digital systems, and managed a large, remote workforce to ensure quality and scalability.

Key Achievements & Quantified Results:

Talent Acquisition & Resource Management: Orchestrated end-to-end recruitment and onboarding for 75+ remote ESL instructors across multiple time zones, implementing data-driven

hiring analytics and competency frameworks that reduced time-to-hire by 30% while maintaining quality standards. Managed comprehensive operations for 40+ concurrent employees, including resource allocation, budget tracking, and performance metrics.

Professional Development & Training: Designed and delivered ongoing professional development programs for teaching staff, conducting quarterly training sessions on pedagogical best practices, technology integration, and ESL methodologies. Implemented a mentorship program pairing senior and junior instructors, resulting in improved instructor retention and student satisfaction scores.

System Implementation & Digital Transformation: Led the full-cycle implementation of Enterprise Management System (EMS) components, successfully translating complex business requirements into functional digital solutions for HR, finance, and curriculum delivery workflows. Reduced manual administrative processes by 40% through strategic automation and system integration.

Curriculum Project Management: Directed high-stakes curriculum development initiatives under aggressive timelines, coordinating cross-functional teams to deliver 15+ course modules within compressed delivery windows. Employed agile project management methodologies to ensure on-time, on-budget completion while maintaining instructional quality and alignment with learning objectives.

Data-Driven Process Optimization: Spearheaded process improvement initiatives and developed automated reporting dashboards for critical operational KPIs, including course completion rates, instructor performance metrics, and student engagement analytics. Streamlined workflows reduced reporting cycle time by 50%, enabling real-time decision-making and proactive intervention strategies.

Quality Assurance & Compliance: Established comprehensive operational policies, standardized procedures, and quality frameworks across the organization, ensuring consistent course delivery and regulatory compliance for all online educational offerings. Implemented systematic quality review processes that maintained 95%+ quality standards across all program deliverables.

2. Program Coordinator

NSCC TechKnow Program

The TechKnow Program role showcases the ability to lead community-focused technical education projects from concept to completion, integrating academic background with practical project management.

Key Achievements & Project Management:

Full-Cycle Project Leadership: Served as Program Coordinator for the TechKnow computer literacy initiative, leading the complete project lifecycle from initial needs assessment and stakeholder consultation through curriculum architecture and full-scale program deployment across 5+ community sites. Delivered project milestones on schedule with zero budget overruns.

Team Building & Volunteer Management: Recruited, trained, and supervised 12+ student and community volunteers through structured onboarding and ongoing development programs. Established clear communication protocols, delegation frameworks, and performance standards that ensured cohesive program delivery and maintained 90%+ volunteer retention rate.

Curriculum Design & Instructional Development: Architected a comprehensive, modular computer literacy curriculum incorporating foundational digital skills, practical applications, and project-based learning methodologies. Program achieved 85% completion rate among participants, with post-program surveys indicating significant improvements in digital confidence and competency.

Operational Excellence & Resource Coordination: Managed complex logistics including NSCC resource coordination, multi-site scheduling, equipment deployment, and technology asset management. Successfully deployed 50+ technology resources and coordinated 40+ training sessions across distributed community locations while maintaining consistent quality standards.

3. Integrated Skills: Cross-Cultural Collaboration, ESL & Leadership

This section synthesizes the soft skills and specialized expertise required for global educational management, drawing on TEFL Certification and Mandarin Language Studies at National Taiwan University.

Core Competencies:

Skill Focus	Description and Project Application
Cross-Cultural Project Management	Managed fully remote and distributed teams (e.g., QOEG), requiring negotiation, clear communication, and empathetic leadership across different time zones and work cultures. The goal was to align diverse personnel toward common operational and instructional objectives.
ESL Curriculum Design & Delivery	Applied TEFL-certified methodologies to oversee the development and quality assurance of online ESL curriculum. This included analyzing student performance data to inform course development and instructional improvements, ensuring materials were culturally relevant and linguistically appropriate.
Strategic Leadership & Vision	Demonstrated ability to lead organizational change and drive business transformation. At QOEG, this involved translating the strategic vision for operational scale into tangible process improvement initiatives and new technology deployments.
Soft Skills	Analytical Thinking, Problem-Solving (analyzing student and staff data to resolve complex issues), Strong Communication, Team Development (mentoring and managing staff for high-performance), and Flexibility in managing rapid change.
